19   UNITED STATES DISTRICT COURT

20   NORTHERN DISTRICT OF CALIFORNIA

21   SAN FRANCISCO DIVISION

22

ORACLE AMERICA, INC.	Case No. CV 10-03561 WHA
Plaintiff,	**ORACLE'S STATEMENT OF ISSUES REGARDING COPYRIGHT**
v.	
GOOGLE INC.	
Defendant.	Date: April 16, 2011 Dept.: Courtroom 8, 19th Floor Judge: Honorable William H. Alsup

28

Pursuant to the Court's request (ECF No. 854), Oracle America, Inc. hereby provides the following summary of its copyright infringement allegations to be tried:

What Oracle accuses of copyright infringement are:

1. The Android documentation for the 37 API packages listed below, including the selection, arrangement, and structure of all API elements (including names) in that documentation. Oracle alleges that Google copied an estimated 103,400 lines[1] from the Java API specifications into Android's documentation.

1.	java.awt.font	20.	java.text
2.	java.beans	21.	java.util
3.	java.io	22.	java.util.jar
4.	java.lang	23.	java.util.logging
5.	java.lang.annotation	24.	java.util.prefs
6.	java.lang.ref	25.	java.util.regex
7.	java.lang.reflect	26.	java.util.zip
8.	java.net	27.	javax.crypto
9.	java.nio	28.	javax.crypto.interfaces
10.	java.nio.channels	29.	javax.crypto.spec
11.	java.nio.channels.spi	30.	javax.net
12.	java.nio.charset	31.	javax.net.ssl
13.	java.nio.charset.spi	32.	javax.security.auth
14.	java.security	33.	javax.security.auth.callback
15.	java.security.acl	34.	javax.security.auth.login
16.	java.security.cert	35.	javax.security.auth.x500
17.	java.security.interfaces	36.	javax.security.cert
18.	java.security.spec	37.	javax.sql
19.	java.sql		

2. The selection, arrangement, and structure of all API elements (including names) of the Android class library source code and object code that implements the 37 API packages.

3. The declarations of the API elements in the Android class library source code and object code that implements the 37 API packages.

4. The Android class library source code and object code that implements the 37 API packages as derivative works of the Java API specifications, including the English-language descriptions.

5. Two Android source code files (and corresponding object code), TimSort.java and ComparableTimSort.java, which are part of Android's implementation of the 37 API packages.

---

[1] Oracle calculated this estimate by counting the lines of a sample of the Android documentation.

6. Eight Android source code files (and corresponding object code), AclEntryImpl.java, AclImpl.java, GroupImpl.java, OwnerImpl.java, PermissionImpl.java, PrincipalImpl.java, PolicyNodeImpl.java, AclEnumerator.java, which are not part of Android's implementation of the 37 API packages.

7. Comments contained in two Android source code files, CodeSourceTest.java and CollectionCertStoreParametersTest.java, which are not part of Android's implementation of the 37 API packages.

The tangible medium or media of expression in which the above are fixed are electronic storage media and printed documentation.

What Oracle does not accuse of copyright infringement are:

1. Android's use of the Java programming language.

2. Any particular name of an API element, including names for each package, class, exception, field, method, and parameter name, considered individually.

3. The Android source code implementing the APIs contained in the 37 packages at the line-by-line level, except as set forth above.

4. The idea of APIs.

5. The Dalvik virtual machine (without associated class libraries).

6. Android API packages and associated class libraries other than the 37 API packages and associated class libraries listed above.

7. Other Android source code and object code except as set forth above.

Dated: April 12, 2011
